

# SPACE (2-5 Year Old Space Travelers)

## MONDAY

### Craft:

\* [Make your own Constellation Projector](#)

(By Playground Parkbench)

(I love this craft because with the free printable included in the directions your little one gets to make almost the whole craft. You add light and your little one gets to see the constellations come alive in your house.)

### Printable:

[Space Coloring Pages](#)

(By Itsy Bitsy Fun)

### Quiet Activities:

Sensory Bin: Black [Water Beads](#) with [space figures](#) and aluminum foil (ball pieces up to be meteors).

### What to read:

\* [What's Out There, A Book About Space](#)

\* [Pete the Cat, Out of This World](#)

### What to watch:

[Storybots: Outer Space](#)

(YouTube)

## TUESDAY

### Fun with Food:

\* [How to Make Astronaut Pudding](#) (By Feels Like Home)

(I love this because in these instructions for the recipe there is a video about dining on the space station. The recipe is super easy to follow with items easy to find at any grocery store)

Or...You can simply share this yummy [Astronaut treat!](#)

Other fun foods:

\*Breakfast: Rocket fruit kabobs with alternating bananas and strawberries

\*Snack: Oreo [Cookie Moon Phases](#)

\*Lunch: Quesadilla planet with star fruit

### Printable:

[Space Cutting Practice](#)

(By Sugar, Spice & Glitter)

### Quiet Activities:

[Marshmallow Constellations](#)

Leave out marshmallows (as the stars) and toothpicks for your little one to make the constellations.

### What to read:

\* [Little Kids First Big Book of Space](#)

## WEDNESDAY

### Fieldtrip:

#### In person:

Once evening arrives head to your own back yard or an open field near your home. Take a [telescope](#) or lie on a blanket and explore the sky. Talk about all the stars you see. Use the "Night Sky" app on your iPhone to simply point at the sky and learn about the stars you see.

#### Virtual "Fieldtrip":

\* [Curiosity Rover to see the real surface of Mars](#)

\* [International Space Station Tour](#)

\* [Tour of the Moon](#)

#### Printable:

[Space Maze](#)

#### Quiet Activities:

Free art time: Leave out simple black paper with star stickers and a white or yellow colored pencil for your little one to create a picture of space.

#### What to read:

\* [How to Catch a Star](#)

\* [Cat in the Hat, There's No](#)

[Place Like Space](#)

#### What to watch:

[Ready Jet Go!](#)

## THURSDAY

### Activity:

[Fizzing Planets](#)

(By Fun-A-Day)

(I love this activity because you and your little one can look up the planets to use their favorite as inspiration and then they get to do some science, get their hands dirty and then watch it foam and fizzle.)

#### Printable:

[Rocket Count & Trace](#)

#### Quiet Activities:

Leave out cut out construction paper triangles, squares with each letter of your child's name and let them glue the letters on black paper in order to make their own Rocket name.

#### What to read:

\* [My Best Pop-Up Space Book](#)

\* [Mousetronaut](#)

## FRIDAY

### Move Your Body Activity:

[Ribbon Rocket](#) (By Teach Beside Me)

(I love this activity because it is super simple but your little one will love pulling the ribbon with you to see it fly back and forth. They can design their own rocket however they decide using simple materials.)

And/Or

Reach for the Stars – Hang up white crate paper with stars hanging from the ends just above where you think your little one can reach. Let them train like an astronaut as they jump to try to reach the stars.

#### Printable:

[Moon Coloring Page](#)

#### Quiet Activities:

Sensory bin: Black and red beans with [glow in the dark stars](#) and [3D planets](#).

#### What to read:

\* [The Magic School Bus Lost In The Solar System](#)

#### Friday Night Movie Picks:

\* [Fly Me To The Moon](#)

\* [Space Buddies](#)
